UNIT-3

PARALINGUISTICS & CHRONEMICS

Paralinguistics

- **Paralinguistics/ Vocalics- features** are non-verbal cues that help you to give urgency to your voice.
- Your voice is your trade mark ; it is that part of yourself that adds human touch to your words. Words are static on a page.
- Voice gives extra life to your delivery
- It is useful to understand the **characteristics nuance of voice:**
- **i))Quality** :Is a characteristic that distinguishes one voice from another. Each one of us has a unique voice. And its quality depends on its resonating mechanism. It may be rich and resonating, soft and alluring, thin and nasal

characteristics nuances of voice:

- ii) **Volume:** is the loudness or softness of the voice . Your voice should always project but need not always be loud. If the place you are speaking in is large and open , the volume should be high; and if the place is small and enclosed , the volume should be low . Way to improve your voice and speaking style is through reading aloud.
- iii) **Rate or Pace** is the number of words which you speak per minute. It varies from person to person and from **80 to 250 words per minute**. The normal rate is from **120 to 150 words per minute.** Too slow speech makes it dull and monotonous. A fast speech may cause

characteristics nuances of voice:

- iv) **Pitch:** It refers to the number of vibrations per second of your voice. The rise and fall of the voice conveys various emotions. **Inflection** give warmth , luster, vitality and exuberance to your speech. If you are excited joyous, ecstatic, triumphant, and angry your pitch becomes high.
- **Intonation** refers to the rising and falling of the pitch of the voice when we speak.
- v) **Articulation:** Speaker should be careful not to slop , slur, chop, truncate , or omit sounds between words or sentences. If all sounds are not uttered properly , the flow of understanding gets interrupted and

characteristics nuances of voice:

- vi)**Pronunciation:** If articulation is speaking out all sounds directly, pronunciation requires us to speak out all sounds in way that is generally accepted. The best way is to follow British Received Pronunciation. (R.P)
- vii) **A pause** is a short silence flanked by words. A pause in speaking lets the listener reflect on the message and digest accordingly. It enhances your speech as it is a natural process to give a break
- **viii)Voice modulation**: Modulation of voice brings flexibility and vitality to your voice , and you can express emotions , sentiments like impatience , careful

CHRONEMICS

- **Chronemics** is the study of how human beings communicate through their use of time . How do you communicate with others ? What does time mean to you? We try to control time, trying to use it more effectively.
- **In professional world , time** is a valuable commodity.
- **Chronemics differs from person to person :** as people have their own time language . To one person who wakes up at 8:00 am , 6:30 a.m. may be early; to another person 8: a.m. may be late if he wakes up at 5: am every day.
- **Chronemics differs from culture to culture .:**
- **Time language varies from culture to culture .**In Latin countries , meetings usually begin well after their appointed time. . It is customary and no one is offended by the delay. In Scandinavia and Germany , strict punctuality is the rule, and tardiness is frowned upon.

Chronemics

- As a speaker , you should be aware of schedule is a chronemic element .
- Good timing is crucial, rehearse your formal presentation.
- Staying within time limits is a mark of courtesy and professionalism.
- At the beginning of your presentation assure the listeners that you will be giving them time at the end of presentation.
- Shorter the time allowed , the more difficult the task
- Needs careful planning and effective use of visual aids
- With care and practice , you can achieve
