Unit 2-Answer Bank

	Questions	***Answers***	***Difficulty Level***	***Marks***	***Time(In Minutes)***
1	Explain in detail the Air Stream Mechanism.	Air Stream Mechanism ● For production of speech sounds we need an air stream . ● Eg.- If you put the in front of your mouth while saying ‘ ah’, and baa-your palm will feel the warm air getting out of your mouth. ● The air that flows out of your mouth is modified into speech sounds by the action of certain organs of your body ● These organs referred to as **Organs of Speech** ● Thus ,an **air stream** is the basis of speech sounds ● An **Air Stream** can also be called a **moving current of air**. ● For the articulation of most **speech sounds** of most languages , **lung air is used.** ● The air that we breathe out is modified into speech sounds.	Very Difficult	05	20

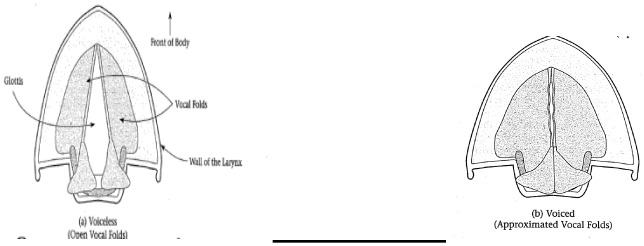

Unit 2-Answer Bank

2	Draw a neat diagram of organs of speech with appropriate labeling.	 **Figure: Organs of Speech**	Very Difficult	5	20
3	Elaborate in detail the Phonatory System	Phonatory System: The larynx is also called as 'Adam's Apple' , situated at the top of the windpipe. The air from the lungs has to come out through the windpipe and the Larynx. In the larynx are situated in pair of lip like structure. These are called the Vocal cords and these are placed horizontally from front to back. They are attached in front and can be separated at the back. The opening between the cords is called the glottis. The vocal cords can be opened and closed and when the two cords come very close and when the two cords very close to each other, the glottis will be shut completely. In fact when we swallow food and water, the vocal cords shut the glottis and thus prevent the food or water from entering the windpipe. When we breathe in and out, the vocal cords are drawn wide apart and thus the glottis is open. The air enters the lungs or get out through the wide open glottis. When we produce some speech sounds, the vocal cords are wide apart and the glottis is open. Such sounds produced with a wide –open glottis and are called as voiceless sounds.	Very Difficult	5	20

Unit 2-Answer Bank

		The first sounds in English word peel, ten, keen, chin, fine, seen, shine and hat are voiceless sounds. During the production of certain sounds, the vocal cords are loosely held together and the pressure of the air from the lungs makes them open and close rapidly. This is called the vibration of the vocal cords and the sounds produced when the vocal cords vibrate are called voiced sounds. All the sounds in English words bead, deed, girl, judge, vine, measure, need , wing, red, yard and well are voiced sounds.			

Unit 2-Answer Bank

4	Elaborate the function of Vocal Cords with its voiceless and voiced position. Support your answer with apt diagram.	Function of Vocal Cords ● The air enters the lungs or get out through the wide open glottis. ● When we produce some speech sounds, the vocal cords are wide apart and the glottis is open. ● Such sounds produced with a wide –open glottis and are called as voiceless. Sounds. The first sounds in English word peel, ten, keen, chin, fine, seen, sign and hat are voiceless sounds. ● During the production of certain sounds, the vocal cords **<u>are loosely held together</u>** and the pressure of the air from the lungs makes them open and close rapidly. ● This is called the vibration of the vocal cords and the sounds produced when the vocal cords vibrate are called <u>voiced sounds</u>. ● All the sounds in English words bead, deed, girl, judge, vine, measure, need , wing, red, yard and well <u>are voiced sounds.</u> 	Very Difficult	5	20

Unit 2-Answer Bank

5	Explain in detail the Articulatory System.		Very Difficult	5	20
6	Explain the difference between Consonants and Vowel Sounds.	● Speech sounds are divided into broadly into **two categories**, namely **vowels and consonants**. ● If we say English words- **shoe or shine**, we realize that the words are made up of two sounds, one represented by the letter ' **Sh**' and the letters **'oe'** ● When we produce the sounds represented by the letters 'sh' slowly, we see that during the production of this sound, the air escapes through the mouth with friction. ● when we produce the sound represented by the letters 'oe', the air escapes through the mouth freely and we do not hear any friction. ● The sound that is represented by letters **'sh**' in the word shoe is a **consonant** and sound represented by '**oe'** in the word shoe is a **vowel**. ● If we say words **she, shoe, shy, show and ship**, we produce the sounds represented by letters- **e, oe, y, ow & i** in these words , the air escapes through the mouth freely without friction ● Similarly in words- shoe , zoo, and who, we hear a friction during the production of the sounds represented by the letters sh, z and wh. ● All these sounds are therefore consonants.	Very Difficult	5	20

Unit 2-Answer Bank

		● The Vowels and consonants are further classified into other sub categories.			
7	Explain the role of soft palate in production in oral and nasal sounds and support your answer with diagram.	The **velum** or **soft palate** allows air to pass through the nose and through the mouth. Often in speech it is raised so that air cannot escape through the nose. The other important thing about the velum is that it is one of the articulators that can be touched by the tongue. When we make the sounds k and g the tongue is in contact with the lower side of the velum, and we call these **velar** consonants. The Soft Palate affects voice quality too—a lifted soft palate creates more space of the sound, which helps make it brighter and louder and more resonant in the front of the face. **A** dropped soft palate allows for sound to move into the nasal passages, which allows for nasal consonants, [m, n, ŋ]	Very Difficult	5	20
8	What is Phoneme? Classify the basic sounds of English.	A phoneme is the smallest unit of sound in a word that makes a difference in its pronunciation, as well as its meaning, from another word. For instance, the /s/ in 'soar' distinguishes it from /r/ in 'roar', as it becomes different from 'soar' in pronunciation as well as meaning.	Very Difficult	5	20
9	How is Production of Vowel and Consonants sound different from each other?	Speech sounds are divided broadly into two categories, namely vowels and consonants. If we say English words- shoe or shine, we realize that the words are made up of two sounds, one represented by the letter ‘ Sh’ and other represented by the letters ‘oe’ . When we produce the sounds represented by the letters ‘sh’ slowly, we see that during the production of this sound, the air escapes through the	Very Difficult	5	20

Unit 2-Answer Bank

		mouth with friction. On the other hand, when we produce the sound represented by the letters 'oe', the air escapes through the mouth freely and we do not hear any friction. The sound that is represented by letters 'sh' in the word shoe is a consonant and sound represented by 'oe' in the word shoe is a vowel. If we say words she, shoe, shy, show and ship, we will realize that when we produce the sounds represented by letters- e,oe,y, ow &i in these words , the air escapes through the mouth freely without friction. All these sound are therefore vowels, but each one of them sounds differently from others. Similarly in words- shoe see, zoo, and who, we hear a friction during the production of the sounds represented by the letters sh, s, z and wh. All these sounds are therefore consonants. The Vowels and consonants are further classified into other subcategories.			
10	Give five examples of words each with pronunciation that uses the following Sounds: • /i/ • /a:/	• /i/- clean, seen, feel, scream, • /a:/-arm, car, star, far, stark	Very Difficult	5	20
11	Give five examples of words each with pronunciation that uses the following Sounds:	/au/- owl, august, autumn, aura, taught	Very Difficult	5	20

Unit 2-Answer Bank

	/au/ /^/	/^/-bus, hut, cut, fun, us			
12	Give five examples of words each with pronunciation that uses the following Sounds: /b/ /k/	/b/- ban, bush, because, ball, battle /k/-cow, king, cattle, cool, kite	Very Difficult	5	20
13	Give three examples of words each with pronunciation that uses the following Sounds: /t/ /d/ /k/ /f/ /v/	/t/- task, tool, table, fettle, team /d/- desk, deed, define, day, devine /k/ care, cream, coin, king, queen /f/- face, fun, fire, fossil, farm /v/- win, very, vice, twin,whisk	Very Difficult	5	20
14	Give three examples of words each with pronunciation that uses the following Sounds: /s/ /z/ /m/	/s/- seen, sing, site, some, so /z/- zoom, zeal, zink , zip, zero /m/- morning, meal, man, money, moon /n/- nose, noise, none, notch, never	Very Difficult	5	20

Unit 2-Answer Bank

	/n/ /w/	/w/- what, weather, why, water, wear			
15	Give five examples of words each with pronunciation that uses the following Sounds: /r/ /h/	/r/- ring, rise, rear, real, root /h/-hat, high, hero, hot how	Very Difficult	5	20
16	Underline the word or words that you would like to give emphasis in the following sentences: I have been working all day He that is content is rich You must be back in time I enjoyed the trip very much	I have been working all day He that is content is rich You must be back in time I enjoyed the trip very much			
17	Underline the word or words that you would like to give emphasis in the following sentences(If needed then can give explanation): I have been working all day Your shoes need polishing Her act was excellent The play attracted a huge crowd	I have been working all day Your shoes need polishing Her act was excellent The play attracted a huge crowd	Difficult	5	20

Unit 2-Answer Bank

18	Underline the word or words that you would like to give emphasis in the following sentences: • I have been working all day • This year the conference was held in Nagpur for two days. • Yesterday I came at 10 O'clock to the office. At times he will see even two or three movies in a day.	• I have been <u>working</u> <u>all</u> <u>day</u> • This <u>year</u> the <u>conference</u> was held in <u>Nagpur</u> for <u>two days</u>. • <u>Yesterday</u> I <u>came</u> at <u>10</u> O'clock to the office. • At times <u>he</u> will <u>see</u> even <u>two or three movies</u> in a <u>day.</u>	Difficult	5	20
	Moderate		Moderate	5	15
1	Elaborate the position of soft palate in nasal Sound with diagram and sounds.		Moderate	5	15
2	Elaborate the position of soft palate in oral Sound with diagram and some example.		Moderate	5	15
3	Explain the Nasal sounds with examples.	**Nasal Sounds:** • /m/, /n/, ing • Man, moon, no, now, ring, morning	Moderate	5	15
4	Explain the plosive sounds with examples.	**Stops or Plosives**:- such sounds are produced by a complete obstruction of the airstream in the mouth, eg- /p/, /b/, /t/, /k/, & /g/ as in pin, bin, tin, din, kite, gun.	Moderate	5	15

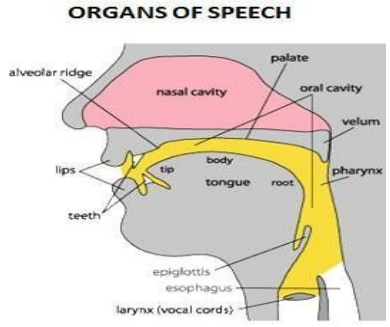

Unit 2-Answer Bank

5	Explain the Affricate sounds with examples.	**Affricates**:-such sounds are produced by a stop closure followed immediately by a slow release of the closure characteristic of the fricative, eg-/tʃ/&/dʒ/ as in chin, cheat, jump,jar.	Moderate	5	15
6	Explain the Fricative sounds with examples.	**Fricatives:**- such sounds are produced by a partial obstruction of the airstream , where the passage in the mouth through which the air escapes is very narrow, causing friction, eg-/f/,/v/,/s/,/z/,/d/,/ʃ/,as in fun, vine, sin, zoom, tin, dream, shrink &zoom	Moderate	5	15
7	Explain the Lateral sounds with examples.	**Lateral:**- such sound is produced when the air flows over the sides of the tongue. Eg- /l/ -as in live, learn, long	Moderate	5	15
8	Explain the Approximant sounds with examples.	**Approximant:-** such sounds are produced with little or no obstruction of the air in the mouth, eg-/j/&/w/.When occurring in a word they must always be either followed or preceded by a vowel, and in their articulation the tongue moves rapidly in a gliding fashion either toward or away from a neighboring vowel. As in yet, young, watch, warm.	Moderate	5	15
9	Explain the Glottal sounds with examples.	Glottal:- Glottal Sounds are produced at the glottis and the two vocal cords are the articulators. The initial sound in the English words - /h/ as in hat , him .	Moderate	5	15
10	Explain the Bilabial sounds with examples.	Bilabial sounds:- Two lips are the articulators.	Moderate	5	15

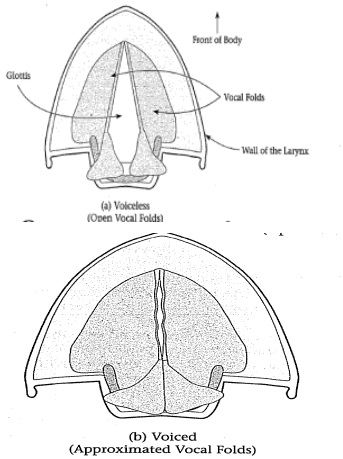

Unit 2-Answer Bank

		The initial sounds in Englishwords, eg- /p/, /b/,and /m/ as in pin, bin,mile			
11	Explain the Labio- Dental sounds with examples.	Labio- dental sounds:- The active articulators is the lower lip and the passive articulators are the upper front teeth. eg- /f/ and /v/ as in fine , vine	Moderate	5	15
12	Explain the Dental sounds with examples.	Dental:- The tip of the tongue is the active articulator and the upper front teeth are the passive articulators. The initial words in the English words- /θ/and /ð/as in thin and then.	Moderate	5	15
13	Explain the Alveolar sounds with examples.	Alveolar:- The tip or the blade of the tongue is the active articulator and the teeth ridge is the passive articulator. The initial sounds in the English words / t/, /d/, /n/,/s/,/z/,/l/ as in tin, din, near, sin, zip, & live.	Moderate	5	15
14	Explain the Post -Alveolar sounds with examples.	Post- Alveolar:-The tip of the tongue is the active articulator and the part of the roof of the mouth that lies immediately behind the teeth ridge is the passive articulator. The sound represented by the letters /r/ as in try & dry.	Moderate	5	15
15	Explain the Plato –Alveolar sounds with examples.	Palato- Alveolar:- The tip of the tongue and blade of the tongue are the active articulators	Moderate	5	15

Unit 2-Answer Bank

		and the teeth ridge is the passive articulator. Simultaneously , the front of the tongue is raised in the direction of the hard palate. The initial sounds in the English words-/tʃ/&/dʒ/ as in cheap, chin, jump, jeep.			
16	Explain the Palatal sounds with examples.	Palatal:-The front of the tongue is the active articulator and the hard palate is the passive articulator. The initial sound in the English word- /j/ as in yes &young.	Moderate	5	15
17	Explain the Velar sounds with examples.	Velar:- The back of the tongue is the active articulator and the soft palate is the passive articulator. The first sounds in the English words- /g/ as in bag, bang,king.	Moderate	5	15
18	Draw a neat diagram of organs of speech .		Moderate	5	15

Unit 2-Answer Bank

19	Draw a neat diagram of voiced and voiceless position of vocal cords		Moderate	5	15
	Easy Questions				
1	Translate the following words in Phonetic transcriptions:- ● School ● Bank ● College ● Education	/skuːl/ /bæŋk/ /ˈkɒlɪdʒ/ /ˌedjʊˈkeɪʃ(ə)n/	Easy	2	5
2	Translate the following words in Phonetic transcriptions:- ● Go ● Home ● Eat ● hat	/gəʊ/ /həʊm/ /iːt/ /hæt/	Easy	2	5
3	Translate the following words in Phonetic transcriptions:- ● bus ● gate ● light	/bʌs/ /geɪt/ /laɪt/	Easy	2	5

Unit 2-Answer Bank

	● fan	/fæn/			
4	Translate the following words in Phonetic transcriptions:- ● Air ● Water ● Rain ● Car	/eə(r)/ /ˈwɔːtə(r)/ /reɪn/ /kɑː(r)/	Easy	2	5
5	Translate the following words in Phonetic transcriptions:- ● Bat ● Pen ● Ink ● Late	/bæt/ /pen/ /liŋk/ /leit/	Easy	2	5
6	Translate the following words in Phonetic transcriptions:- ● Lake ● Cake ● Sand ● land	/leik/ /keik/ /sænd/ /lænd/	Easy	2	5
7	Translate the following words in Phonetic transcriptions:- ● Fun ● Play ● Rat ● Cat	/fʌn/ /plei/ /ræt/ /kæt/	Easy	2	5

Unit 2-Answer Bank

8	Translate the following words in Phonetic transcriptions:- ● Game ● Name ● Same ● Fame	/geim/ /neim/ /seim/ /feim/	Easy	2	5
9	Translate the following words in Phonetic transcriptions:- ● Life ● Long ● Sing ● Song	/laif/ /l ɔːŋg/ /siŋg/ /s ɔŋg/	Easy	2	5
10	Translate the following words in Phonetic transcriptions:- ● Man ● Money ● Child ● No	/mæn/ /mʌni/ /tsaild/ /nəu/	Easy	2	5
11	Translate the following words in Phonetic transcriptions:- ● Fat ● Bat ● Cut ● Out	/fæt/ /bæt/ /kʌt/ /aut/	Easy	3	10
12	Translate the following words in Phonetic transcriptions:- ● Good	/guːd/	Easy	3	10

Unit 2-Answer Bank

	• Thin • Sin • Kin	/θin/ /sin/ /kin/			
13	Translate the following words in Phonetic transcriptions:- • Bad • Pain • Gain • Test	/bæd/ /pein/ /gein/ /test/	Easy	2	5
14	Translate the following words in Phonetic transcriptions:- • Pass • Boy • Girl • Lady	/paːs/ /bɔi/ /gɜːl/ /leidi/	Easy	2	5
15	Translate the following words in Phonetic transcriptions:- • Peel • Boon • Cool • Do	/piːl/ /boːm/ /kuːl/ /əud/	Easy	2	5
16	Translate the following words in Phonetic transcriptions:- • Sin • Zoo • She • He	/sin/ /zuː/ /siː/ /hiː/	Easy	2	5
