YCCify - Yeshwantrao Chavan College of Engineering

IT701 - Machine Learning | Dr. S. S. Khedkar

Unit 1 - Introduction to Machine Learning

Topic: Learning Paradigms & Foundations

1.1 Overview of Machine Learning

Machine learning is a field of inquiry devoted to understanding and building methods that "learn".

Core Paradigms:

* Supervised Learning labeled training targets
* Unsupervised Learning discovering hidden patterns
* Reinforcement Learning reward/penalty optimization

Key Components:

* Task T
* Performance Metric P
* Experience E

Unit 1 - Introduction to Machine Learning

Topic: Learning Paradigms & Foundations

1.2 Hypothesis Space & Inductive Bias

Every machine learning algorithm requires inductive bias to generalize beyond seen instances.

Important Concepts:

* Version Space
* Candidate Elimination Algorithm
* PAC Learning Probably Approximately Correct
* Occams Razor Principle
